

Oral and Poster presentation

We need to provide oral and poster presentations in different sections (2 sections for it below). Then in each section we need to separate the list of presentation that are multi-partners and mono partners. For the monopartners include your list where you find you institution/lab name. So make sure you include your presentations at the right place. Do not hesitate to also report national presentations, but only the one that showcase key PACMEDY work, not everything. Make also sure that you include the different presentation in order such that each list starts with 2017 and ends with the latest presentations following what has already been done. Do not include presentations made during the PACMEDY meetings or webinars, we will have a specific sections elsewhere for them.
